

COVID Action Notice

Indiana Wellness College

10/19/2020

An IWC student who last attended campus October 11th became ill last week and underwent COVID testing Monday, October 12th. IWC has received official documentation of a positive test result and has confirmed that this student did not contract the virus at IWC.

The student has not attended campus since that date, but you are being informed as a practice of good will.

IWC has received no notice of transmission of the illness to other staff, students, or clients, and we want to highlight the continued heightened hygiene standards being employed at IWC, including EPA-grade disinfectants and use of masks. See our website for a guide to our hygiene practices to continue preventing the spread of COVID 19 and other pathogens:

www.IndianaWellnessCollege.edu (under Consumer Information and Disclosures)

As with any contagion situation, if you experience symptoms of illness it is suggested that you avoid potentially exposing others and follow the advice of your medical advisors.
